Thermochimica Acta 246 (1994) 429–435

thermochimica acta

Subject index

Ageing
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
Retrogradation of starch and the role of its components 329
Agglomerate
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99
Alanine
The enthalpies of solution of α-alanine in water and in some alkali metal chloride solutions at 298.15 K 49
Algorithm
Use of databases in thermal analysis. Part 6 107
Alkali metal chloride
The enthalpies of solution of α-alanine in water and in some alkali metal chloride solutions at 298.15 K 49
Aluminium nitride
Thermal analysis of new glass ceramic composite tapes and their components 81
Amylopectin
Retrogradation of starch and the role of its components 329
Amylose
Interactions between starch and lipids studied by DSC 343
Retrogradation of starch and the role of its components 329
Azeotropic
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99

Binary system
Oxidation of zinc sulfide by means of zinc sulfate 141
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
BSOD
Differential scanning calorimetry of the irreversible denaturation of bovine superoxide dismutase 183
Butanol
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99
Butylamine
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71

Cadmium
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
Calorimetry
A review of thermal analysis studies of starch gelatinization 309
Calorimetric studies of the neutralization of polygalacturonic acid 25
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417
Carbon dioxide
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417
Cement
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Ceramic
Thermal analysis of new glass ceramic composite tapes and their components 81

Cereal
Probing molecular and structural thermal events in cereal-based products 357
Charge density
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
Complexation
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
Conductivity
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Counterion
Calorimetric studies of the neutralization of polygalacturonic acid 25
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
Coupled technique
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99
Thermal analysis of new glass ceramic composite tapes and their components 81
Crystallization
Stability-related transitions of amorphous foods 249
Thermal analysis of new glass ceramic composite tapes and their components 81
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Cuticular wax
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417

Database
Use of databases in thermal analysis. Part 6 107
Decomposition
Thermal behaviour and non-isothermal decomposition kinetics of 2-methyl and 2-ethyl benzo[b]thiophene-1,1-dioxide 123
Denaturation
Differential scanning calorimetry of the irreversible denaturation of bovine superoxide dismutase 183
Differential scanning calorimetry: a useful tool for studying protein denaturation 371
Thermal denaturation and heat-induced gelation properties of β-lactoglobulin. Effects of some chemical parameters 387
Deprotonation
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
Diffusion
Stability-related transitions of amorphous foods 249
Dimethoxybenzoate
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
Distillation
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99
DMA
Probing molecular and structural thermal events in cereal-based products 357
DMF
Ionization thermodynamics of nitrobenzoic acids in water–DMF mixtures 243
DSC
A review of thermal analysis studies of starch gelatinization 309
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Differential scanning calorimetry of the irreversible denaturation of bovine superoxide dismutase 183
Differential scanning calorimetry: a useful tool for studying protein denaturation 371
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
Glass transitions and state diagrams for typical natural fruits and vegetables 285
Interactions between starch and lipids studied by DSC 343
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Polymer melting: simulation and experimental results from a single melting peak model system 153
Probing molecular and structural thermal events in cereal-based products 357
Retrogradation of starch and the role of its components 329
Stability-related transitions of amorphous foods 249
The use of stepwise differential scanning calorimetry for thermal analysis of foods 299
Thermal denaturation and heat-induced gelation properties of β-lactoglobulin. Effects of some chemical parameters 387

Thermal stability of glass-filled polyethylenes 167
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
DTA
Oxidation of zinc sulfide by means of zinc sulfate 141
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71
DTG
Molten lithium nitrate–potassium nitrate eutectic: the reaction of chromium(III) chloride and nickel(II) chloride 117
Oxidation of zinc sulfide by means of zinc sulfate 141
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71

Effusion
Simultaneous measurements of enthalpies of sublimation and vapour pressures. Application to the polyols derived from neopentane 57
EMF
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
Emulsion
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Enthalpy–entropy relationship
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229
Enzyme
Differential scanning calorimetry of the irreversible denaturation of bovine superoxide dismutase 183
Equilibrium
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229
Ethanol
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229
Eutectic
Molten lithium nitrate–potassium nitrate eutectic: the reaction of chromium(III) chloride and nickel(II) chloride 117

FeHNaY
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71
Freezing rate
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
Fruit
Glass transitions and state diagrams for typical natural fruits and vegetables 285

Gel
A review of thermal analysis studies of starch gelatinization 309
Retrogradation of starch and the role of its components 329
Gelatinization
A review of thermal analysis studies of starch gelatinization 309
Retrogradation of starch and the role of its components 329
Interactions between starch and lipids studied by DSC 343
Thermal denaturation and heat-induced gelation properties of β-lactoglobulin. Effects of some chemical parameters 387
Glass
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
Thermal analysis of new glass ceramic composite tapes and their components 81
Glass transition
A review of thermal analysis studies of starch gelatinization 309
Glass transitions and state diagrams for typical natural fruits and vegetables 285
Probing molecular and structural thermal events in cereal-based products 357
Stability-related transitions of amorphous foods 249
The use of stepwise differential scanning calorimetry for thermal analysis of foods 299

HDPE
Thermal stability of glass-filled polyethylenes 167
Heat capacity
Heat capacity anomalies at the Verwey transition of $Fe_{3(1-\delta)}O_4$ 1

Heat of gelatinization
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Interactions between starch and lipids studied by DSC 343
Heat of ionization
Ionization thermodynamics of nitrobenzoic acids in water–DMF mixtures 243
Heat of solution
The enthalpies of solution of α-alanine in water and in some alkali metal chloride solutions at 298.15 K 49
Heat of sublimation
Simultaneous measurements of enthalpies of sublimation and vapour pressures. Application to the polyols derived from neopentane 57
Heat of transition
Interactions between starch and lipids studied by DSC 343
Hydration
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Hydroxymethyl
Thermochemical study of the hydroxymethylation reaction 33

Impurity
Molten lithium nitrate–potassium nitrate eutectic: the reaction of chromium(III) chloride and nickel(II) chloride 117
Indazole
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Iron compound
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
IRS
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
Isoequilibrium
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229
Isothermal
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Kinetics
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Thermal behaviour and non-isothermal decomposition kinetics of 2-methyl and 2-ethyl benzo[b]thiophene-1,1-dioxide 123
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Thermochemical study of the hydroxymethylation reaction 33

Lactoglobulin
Thermal denaturation and heat-induced gelation properties of β-lactoglobulin. Effects of some chemical parameters 387
Lanthanon
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
LDPE
Thermal stability of glass-filled polyethylenes 167
Ligand
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Lipid
Interactions between starch and lipids studied by DSC 343

Magnetic susceptibility
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
Magnetite
Heat capacity anomalies at the Verwey transition of $Fe_{3(1-\delta)}O_4$ I
Melting
A review of thermal analysis studies of starch gelatinization 309
Polymer melting: simulation and experimental results from a single melting peak model system 153
Probing molecular and structural thermal events in cereal-based products 357
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65

Microcalorimetry
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Milkfat
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Model
Polymer melting: simulation and experimental results from a single melting peak model system 153
Probing molecular and structural thermal events in cereal-based products 357
Mössbauer
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199

Neopentyl glycol
Simultaneous measurements of enthalpies of sublimation and vapour pressures. Application to the polyols derived from neopentane 57
Neutralization
Calorimetric studies of the neutralization of polygalacturonic acid 25
Nitrobenzoic acid
Ionization thermodynamics of nitrobenzoic acids in water–DMF mixtures 243
Non-isothermal
Thermal behaviour and non-isothermal decomposition kinetics of 2-methyl and 2-ethyl benzo[b]thiophene-1,1-dioxide 123
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405
Novel
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
Nucleation
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405

Oxidation
Oxidation of zinc sulfide by means of zinc sulfate 141

PGA
Calorimetric studies of the neutralization of polygalacturonic acid 25
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
pH
Differential scanning calorimetry: a useful tool for studying protein denaturation 371
Thermal denaturation and heat-induced gelation properties of β-lactoglobulin. Effects of some chemical parameters 387
Phase equilibrium, Ternary system
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65
Phthalate
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
Plastic crystal
Simultaneous measurements of enthalpies of sublimation and vapour pressures. Application to the polyols derived from neopentane 57
Polygalacturonic acid
Calorimetric studies of the neutralization of polygalacturonic acid 25
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
Polymer
Polymer melting: simulation and experimental results from a single melting peak model system 153
Thermal stability of glass-filled polyethylenes 167
Protein
Differential scanning calorimetry: a useful tool for studying protein denaturation 371

Retrogradation
Retrogradation of starch and the role of its components 329
Rice
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
RMS
Stability-related transitions of amorphous foods 249

Schiff base
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Semiconductor
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Silver ion
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229

Solid solution
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
Solubility
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417
Stability
Stability-related transitions of amorphous foods 249
The thermal stability and temperature dependence of the electrical conductivity of Mn(II), Fe(III), Co(II), Ni(II), and Cu(II) indazole Schiff base complexes 175
Thermal stability of glass-filled polyethylenes 167
Thermodynamic stabilities. Thermodynamic parameters of some complexes of 4′-morpholinoacetophenone 4-phenyl-3-thiosemicarbazone 193
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
Starch
A review of thermal analysis studies of starch gelatinization 309
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Interactions between starch and lipids studied by DSC 343
Probing molecular and structural thermal events in cereal-based products 357
Retrogradation of starch and the role of its components 329
Stepwise DSC
The use of stepwise differential scanning calorimetry for thermal analysis of foods 299
Subunit
Calorimetric studies of the neutralization of polygalacturonic acid 25
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
Sucrose
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
The use of stepwise differential scanning calorimetry for thermal analysis of foods 299
Sulphide
Oxidation of zinc sulfide by means of zinc sulfate 141
Supercritical fluid
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417

TA
Use of databases in thermal analysis. Part 6 107
Tape
Thermal analysis of new glass ceramic composite tapes and their components 81
Ternary system
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65
TG
Oxidation of zinc sulfide by means of zinc sulfate 141
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71
TGA
Molten lithium nitrate–potassium nitrate eutectic: the reaction of chromium(III) chloride and nickel(II) chloride 117
Thermal behaviour and characterization of some novel iron(III)-*o*-phthalates 199
Thermal stability of glass-filled polyethylenes 167
Thermodynamics
Differential scanning calorimetry: a useful tool for studying protein denaturation 371
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
Thermodynamic stabilities. Thermodynamic parameters of some complexes of 4′-morpholinoacetophenone 4-phenyl-3-thiosemicarbazone 193
Thermodynamics of complexation of lanthanides by various dimethoxybenzoates in aqueous solution 39
Thiosemicarbazone
Thermodynamic stabilities. Thermodynamic parameters of some complexes of 4′-morpholinoacetophenone 4-phenyl-3-thiosemicarbazone 193
Thiourea
Thermodynamics of complex formation of Ag(I). Part 10. Investigations on complex equilibria between Ag(I) and thioureas in ethanol 229

Titration
Representation of polygalacturonic acid by subunits in the analysis of its potentiometric titration curves 11
TMA
A review of thermal analysis studies of starch gelatinization 309
Effect of freezing rate on the thermal, mechanical and physical aging properties of the glassy state in frozen sucrose solutions 271
Probing molecular and structural thermal events in cereal-based products 357
Transition
Heat capacity anomalies at the Verwey transition of $Fe_{3(1-\delta)}O_4$ 1
Triglyceride
Thermal studies on the crystallization kinetics of triglycerides and milkfat by DSC 405

Vapour pressure
Simultaneous measurements of enthalpies of sublimation and vapour pressures. Application to the polyols derived from neopentane 57
Vegetable
Glass transitions and state diagrams for typical natural fruits and vegetables 285
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417
Verwey transition
Heat capacity anomalies at the Verwey transition of $Fe_{3(1-\delta)}O_4$ 1

Water
A review of thermal analysis studies of starch gelatinization 309
Characterization of rice cooking: isothermal differential scanning calorimetry investigations 317
Retrogradation of starch and the role of its components 329
The enthalpies of solution of α-alanine in water and in some alkali metal chloride solutions at 298.15 K 49
Wax
Solubility of vegetable cuticular waxes in supercritical CO_2 isothermal calorimetry investigations 417

XRD
Interactions between starch and lipids studied by DSC 343
Kinetic analysis of the hydration of $3CaO \cdot 3Al_2O_3 \cdot CaSO_4$ and the effect of adding $NaNO_3$ 129
Retrogradation of starch and the role of its components 329
Studies on the $V_9Mo_6O_{40}$–Cr_2O_3 system 65

Zeolite
Thermal analysis of *n*-butylamine sorbed on FeHNaY zeolites 71
Zinc
Thermodynamic behaviour of zinc and cadmium in liquid-Te-saturated CdTe–ZnTe solid solutions 213
Zinc sulphate
Oxidation of zinc sulfide by means of zinc sulfate 141
Zinc sulphide
Oxidation of zinc sulfide by means of zinc sulfate 141
Zirconia
Investigation on the mechanism of *n*-butanol interaction with zirconia powder 99
